Cybersecurity (network security & threat analysis)

Internet usage: Regularly uses the internet for research, cybersecurity trends, staying updated on web development trends, and seeking inspiration for design elements.

Meet Franklin Sopko, a seasoned cybersecurity executive and web developer with a passion for crafting seamless web experiences! Starting with his personal detailing business, where he developed his own website, Franklin quickly realized the critical importance of cybersecurity. His educational background in Entrepreneurship and Computer Science laid a solid foundation for his dual roles in cybersecurity and web development.

Currently, Franklin is taking on a project to design a website for a unique studio space rental service dedicated to hairdressers, Palette Collective. Balancing this creative endeavor with his responsibilities in cybersecurity, Franklin aims to create a secure, and visually appealing website that meets both the aesthetic and functional needs of his client.

Franklin's typical day is a mix of strategic cybersecurity planning and creative design brainstorming sessions. He starts his mornings with a quick review of industry news,

ensuring that his team is prepared to address any vulnerabilities. Franklin also explores the latest web development trends, and design showcases for fresh ideas.

Franklin values structured online courses and certifications to deepen his cybersecurity expertise, while his web development skills are sharpened through hands-on experimentation and peer collaboration.

Beyond his professional life, Franklin finds relaxation in traveling, working out, and watching sports. He believes in the importance of a work-life balance, using his leisure time to recharge creatively and mentally.

Franklin remains committed to delivering innovative solutions that safeguard digital assets while creating engaging online experiences for his clients.
